

Michael Kean joins HunTel Engineering

Industry veteran Michael Kean has joined HunTel Engineering as Sales and Marketing Manager, according to company President Karlin Kelley.

“Many in the Midwest know Michael from his days at Power & Tel,” said Kelley. “We are pleased to have someone with so many great relationships, and so much experience in the communications industry, join our staff. Companies trust Michael because they know he cares and he understands their needs, their communities and their customers.”

Michael is responsible for working with current clients and building new relationships with companies in Iowa, Nebraska, Missouri and Illinois. He will assist companies as they consider projects and develop plans. Then, when the time is right he will bring in the correct resources from the HunTel team.

“I’m blessed to join HunTel after more than 31 years with Power & Tel. I’ve learned so much from vendors, engineers and customers, and I look forward to using that knowledge to help clients with their projects,” Michael stated. “At events or while visiting companies, I’ve met many in our industry. Now, with a wider service area, I’m excited for the opportunity to meet more of you.”

Michael can be reached at (515) 681-1806 or at michael.kean@htleng.com.

HunTel Engineering, based in Blair, NE, provides engineering services for all aspects of telecommunications and cable television system design throughout a 9 state region. Our certified, and highly trained staff of engineers can re-design a system or develop a completely new system that will best solution for each situation.

These are our company goals:

- As a team, provide our customer's the finest in all aspects of "turnkey" engineering services, specializing in telephone, CATV and wireless facilities.
- Provide expert counseling in all phases of engineering; guaranteeing services and maintaining a consistent level of quality in a manner that is totally acceptable to our customers.
- Respond to our customers needs by staying at the forefront of changing technology and applying this knowledge to the process of making our services the best.
- Listen to and interpret the needs of our customers and guide them in the right direction, without limiting "their" choices to "our" choices.
