#### CDG ANNOUNCES RELEASE OF DISCOUNT PLAN COMPLIANCE MODULE

Champaign, IL – Communications Data Group (CDG) is pleased to announce the release of its newly enhanced Discount Plan Compliance module. The new module works with CDG's current access/interconnect and wholesale billing discount plan architecture to provide enhanced options for analyzing, managing and mechanizing your complex dedicated and special access contracts. The module provides automated updating capabilities, grace period management, penalty calculations, analytical reports for resource planning and the ability to generate customizable compliance letters for customers with contracts that are out of compliance.

According to CDG's Vice President of Product Development, Stan Redden, "The Discount Plan Compliance module offers huge benefits for companies that have an ever growing number of discount plans tied to the billing of dedicated circuits. It gives them tools to manage those plans and work proactively with their customers on their current and future status, while its mechanized/automated capabilities greatly improve staff efficiencies. It also provides companies additional financial benefits in a faster timeframe through features like automated penalty calculations."

CDG's carrier access/interconnect and wholesale billing solution meets the highest C/BOS standard available and provides our clients with the tools required to fine-tune billing to their needs and the reporting capabilities necessary for definitive financial analysis and revenue assurance.

About CDG: CDG offers scalable, accurate billing solutions for voice, video, and data service providers. Options include integrated CABS, Mediation, Customer Care, Plant, Trouble, Service Activation Manager, E-Care, Task Management and third-party financial, mapping and facilities management products.
